

# CONTENTS

<b>Preface . . . . .</b>	<b>7</b>
<b>List of symbols . . . . .</b>	<b>8</b>
<b>Chapter 1 General aspects of NQR spectroscopy . . . . .</b>	<b>9</b>
A. Physical principles of NQR . . . . .	10
B. Recording NQR spectra . . . . .	22
C. Interpreting NQR spectra . . . . .	28
D. Information supplied by NQR . . . . .	36
(i) Structural aspects of NQR information. . . . .	36
(ii) Aspects of bonding from NQR spectra . . . . .	42
<b>Chapter 2 Compounds with discrete structural units . . . . .</b>	<b>52</b>
A. Chemical bonding and structure of hexahalometallates of the type $R_2M^{IV}X_6$ ; cation influence on the EFG at the site of the halogen atom . . . . .	52
B. Hexahalometallates of the types $RM^VX_6$ and $R_3M^{III}X_6$ ; structural trends; mixed-valence hexabromoantimonates. . . . .	62
C. Crystal chemistry of square-planar and tetrahedral halometallates . . . . .	68
(i) Complexes with square-planar tetrahaloanions. . . . .	68
(ii) Complexes with tetrahedral anions. . . . .	73
D. Interactions between heteroatomic ion pairs . . . . .	82
E. The origin of the EFG at the complex ion central atom . . . . .	94
F. Donor—acceptor bonding and charge distribution in $GaCl_3 \cdot L$ , $SnCl_4 \cdot 2L$ and $SbCl_5 \cdot L$ molecular adducts. . . . .	101
G. Molecular adducts of metal halides other than $GaCl_3$ , $SnCl_4$ and $SbCl_5$ . . . . .	115
(i) Complexes of the type $M^{III}X_3 \cdot L$ ( $M^{III} = B, Al, In, As, Sb, Bi$ ) . . . . .	115
(ii) Complexes of the type $M^{IV}X_4 \cdot nL$ ( $M^{IV} = Te, Ti, Zr, Hf$ ) . . . . .	125
(iii) Complexes of the type $MCl_5 \cdot L$ ( $M = Nb, Ta$ ) . . . . .	132
<b>Chapter 3 Compounds with polymer fragments in crystal lattice . . . . .</b>	<b>137</b>
A. Chemically non-equivalent bonds in bridging dimeric compounds . . . . .	138
(i) Bridging dimers of non-transition elements . . . . .	138
(ii) Transition metal halides with dimeric units . . . . .	147

B. Chain (ribbon) polymers . . . . .	161
(i) Infinite chains formed by metal halides . . . . .	161
(ii) Polymeric chalcogenides of Group V non-transition elements; ternary compounds. . . . .	169
C. Compounds with layer structure . . . . .	175
(i) Metal halides and oxyhalides with a "sandwich" lattice . . . . .	176
(ii) Other layer oxyhalides of Group V elements . . . . .	184
(iii) Layer oxides of Group V elements; double oxides and related compounds . . . . .	186
<b>Chapter 4 NQR applications to materials research. . . . .</b>	<b>193</b>
A. Impurities and mixed crystals . . . . .	193
B. NQR in vitreous materials . . . . .	197
C. NQR as method for physico-chemical analysis . . . . .	200
D. After-effects in materials subject to the influence of extreme conditions . . . . .	202
E. NQR in thermodynamically unstable complexes . . . . .	205
F. Potential applications of NQR to the geosciences . . . . .	207
G. NQR study of intermetallic compounds . . . . .	208
H. NQR pulse instrumentation and related echo phenomena . . . . .	210
<b>Concluding Remarks . . . . .</b>	<b>213</b>
<b>References. . . . .</b>	<b>214</b>
<b>Subject Index . . . . .</b>	<b>232</b>
